STRONG FOUNDATION FOR A LIFETIME

At Hesa, we are committed to lend the strength of long lasting foundation that can do wonders for any structure. Every hour, every day and every year, we are growing from strength to strength to realize this dream that's built on the foundation of this core thought.

OUR VISION

At HESA, we take immense pride as an organization centered around our esteemed Customers. With their foundation needs as our focal point and tuning our solutions according to that, we want to be admired as an entity that thinks and acts to provide its consumers with nothing but the very best.

OUR MISSION

Driven to the core with the best-in-class technology and workforce, we look forward to deliver strong and sustainable value to our customers and stake holders, focusing on fostering long-term, valued partnerships.

WE ARE PASSIONATE ABOUT STRONG FOUNDATION. WE ARE HESA

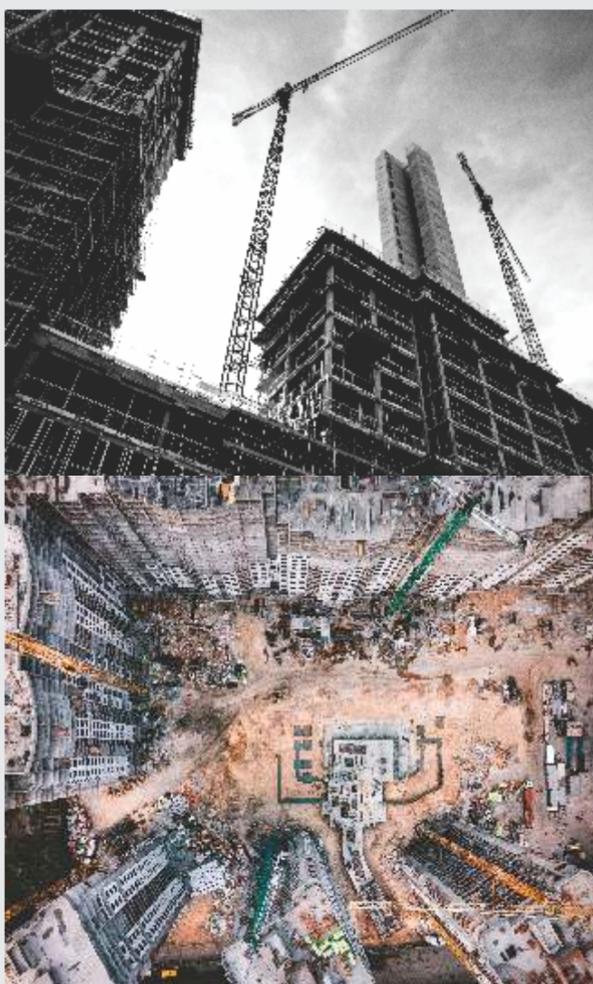

Located In eucalyptus rich timber belt of Punjab, We at HESA are passionate about manufacturing of Construction related wood/veneer/ply based products. As one of the leading manufacturers of Eucalyptus Veneer in the north India and having a experience of two decades in wood, from which we gain our expertise in the timber which we used in plywood/ shuttering manufacturing, we also providing outsourcing solution related to eucalyptus veneer & its related products to India's highly reputed shuttering plywood manufacturers.

OUR BUSINESS CONDUCT

At HESA, we aim to make our shuttering plywood products competitive with a good pricing strategy along with highest quality with results keeping in mind of more repetitions of ply with smooth surface. We are fueled by multiple marketing partners who will work with us and help us to gain market share by increasing our presence in different regions.

BUILDING PERCEPTION

Building on the needs of our customers and changing dynamics of the industry, we try to achieve highest quality and highest standard of shuttering plywood range. Syncing in all the measures to maintain quality standards of the unit. The trick is not to compromise for any short-term objective and returns. Success for us, in the long term will be based on our perseverance, persistence and patience.

MANUFACTURING QUALITY

All thanks to our production capabilities backed by a well endowed research module, we have developed super class shuttering plywood across categories.

Super quality highest repetition smooth shuttering ply: 24 kg to 50 kg (All glue line PF Based)-

Superior quality all core layer glued: PF based GLOSS finish (highest imported 50 to 100 GSM film plywood two times hot pressed)

High End export quality mirror finish all layer glued PF calibrated shuttering plywood (two times hot pressed and calibrated)

Export grad non-densified shuttering plywood (two times hot press mirror finish shuttering plywood)

HESA PRODUCT PORTFOLIO

As we envision for the future, the present and the following years will be dedicated towards the manufacturing of the following, along with exploring a new line of products and innovations. We look forward to achieve this highest quality thanks to our adherence in the plant, work of our marketing team and the assurance towards our clients about consistency in making plywood.

- Shuttering plywood
- Truck and containers flooring
- Pellets
- Marine grade calibrated all red plywood

OUR RANGE OF SHUTTERING PLYWOOD

HESA's unique presentation of Shuttering Plywood is specially designed for concrete work and shuttering applications, across various areas like flyovers, bridges, tunnels, sky scrapers etc. It's a long lasting product and its advantage lies in the fact that they can be re-used.

These shuttering plywood are ideal for usage in

- Concrete beams
- Pillars
- Flooring & slabs
- Site offices, Mezzanine floors
- Trucks & tempo body work etc.

ADVANTAGES :

Lesser overall cost of construction
 Stable, structurally strong & long lasting.
 Less water absorption
 High resistance due to abrasion

THE HESA ADVANTAGE

THE MAX REPETITION ACHIEVED

100% CM TECH
 MANUFACTURING PROCEDURE USED

HESA SALIENT FEATURES

25 TIMES REPETITION
